

SunPower Performance 7

SPR-P7-XXX-COM-S

Commercial Solar Panel

530–550 W | Up to 22.5% Efficient

Ideal for commercial applications

Framed glass-glass

Bifacial energy generation

Enhanced Power Density

With high efficiency TOPCon cell technology offering strong LETID/LID-resistance, increased bifacial energy capture, and a lower temperature coefficient, SunPower Performance panels are uniquely engineered to deliver more lifetime energy compared to standard solar panels.

Proven Reliability

SunPower Performance panel durability is maximized in all types of weather conditions from an innovative shingled-cell design that features flexible interconnects that withstand the stresses of daily temperature swings, an advanced encapsulant that shields components from humidity-induced corrosion, one-third-cut cells that are partitioned through ‘non-destructive cutting’ that reduces the risk of cell micro-cracks, and an advanced electrical architecture that offers resilience against the effects of shade, while mitigating hot-spot formation.

Comprehensive Warranty Coverage

Each SunPower Performance panel is manufactured with the absolute confidence to deliver more energy and greater reliability over time—and backed by one of the industry’s most comprehensive warranties.

1 Standard Test Conditions (1000 W/m² irradiance, AM 1.5, 25° C). NREL calibration Standard: SOMS current, LACCS FF and Voltage.
2 The additional gain from the back side of the panel compared to the power of the front side of the panel at the standard test conditions. It depends on mounting (structure, height, tilt angle etc.) and albedo of the underlying surface.
3 As per IEC 61215-2016 tested and certified. See Safety and Installation Guideline for details.
